 Method of lock and unlocking 

Refer to "Method of the lock and unlocking with the lock lever" of "Method of the lock and unlocking with the door lock switch" of "Method of the lock and unlocking with the key" of P.116 and P.119 and P.120.

 Method of lock and unlocking by remote control
of wireless door lock 

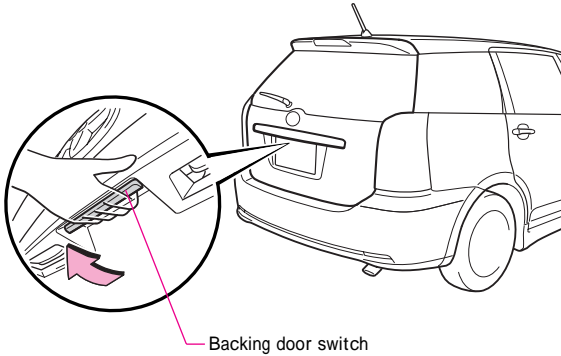

Refer to "How to use of the remote control of a wireless door lock" of P.138.

 Method of lock and unlocking by smart door lock 

Refer to "How to use of a smart door lock" of P.140.

Method of opening and shutting

- When opening it

Push the backing door switch, and lift the backing door. -

Lift to the uppermost part when you open the backing door. -

Confirm the backing door doesn't descend naturally.

- When closing

1 Sell the backing door wholesale.

2 Suppress, and lock bottom.

Confirm the backing door has closed surely before it runs.

- Confirm the light shake of the backing door before it runs and the lock surely. It opens suddenly while running if the backing door is not surely closed the backing door, might cause an unexpected accident, and is dangerous. -

Do not place other people's hands etc. when you close the backing door. Moreover, do not let the child operate the door. In the worst case, it reaches important injury by placing the hand, the head, and the neck, etc. when closing when the child operates it or, it is likely to lead to the death. -

Close the backing door pushing from the outside without fail. When the backing door is closed directly in the backing door grip, the hand and the arm are placed between the backing door, and important injury might be received and it is dangerous. -

Never take the person in the luggage room. In the worst case, it reaches important injury when time that slammed on the brakes and colliding or, it is likely to lead to the death. -

Do not run with the backing door opened. The backing door hits the one outside the car etc. if running while opened, and it might cause an unexpected accident. Moreover, the vehicle exhaust emission invades in the car, it becomes CO intoxication, and it reaches important injury or, in the worst case, it is likely to lead to the death. Confirm the backing door has closed without fail before it runs. -

Do not close the backing door, and do not hang with Baccdoadamparsta.

It might cause an unexpected accident by placing the hand, and shifting when Damparsta is damaged and is dangerous.

**注意****Open completely without fail and use the backing door.**

- Open completely without fail and use the backing door. The backing door drops when using it while opened half, and it is likely to injure. -

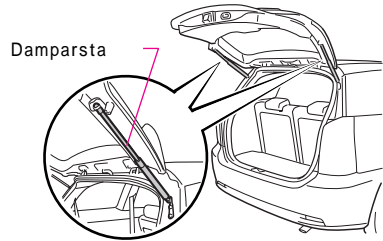

When the backing door is opened and shut in the inclining place, opening and shutting from a smooth place to the backing door might not be done easily, and it open and shut suddenly. -

Damparsta to support the backing door in the backing door is installed. Guard the following to prevent damage and defective operation of Damparsta.

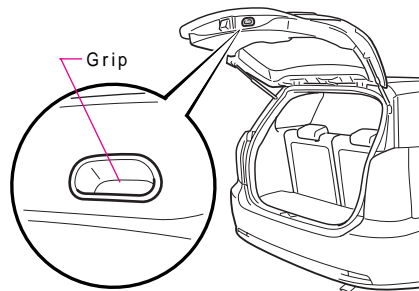

蘆Foreign bodies such as the vinyl splinter, stickers, and adhesive materials must not adhere to the rod part of Sta (expansion and contraction part). Moreover, ..rod part.. do not touch with cotton work gloves etc. to prevent the adhesion of the fiber etc. When Sta smoothly doesn't move or open it, retentivity might be ruined when the foreign body adheres.

蘆Do not install the accessories articles other than a Toyota pure goods in the backing door. When opening it, Sta might not be supported when the weight of the backing door becomes extremely heavy.

蘆Do not get on giving a lot of care to Sta, do not descend, and do not put power horizontally. Sta bends, and the backing door might not be able to be opened and shut.

**Knowledge****About a convenient function****Backing door grip**

When the backing door is sold wholesale, it is convenient.

**About the safety feature**

The backing door can be opened only while stopping because of safety.
