4. Attention when running

Defend the following matter when you run.

In the worst case, it reaches an unexpected accident and serious injury if it doesn't guard or, it is likely to lead to the death.

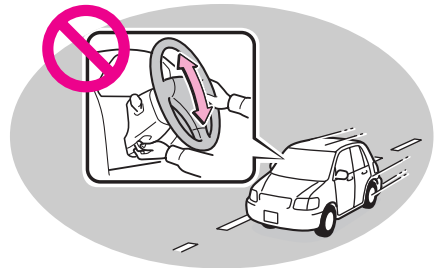

4.
Attention
when
running

注意 Do not stop the engine while running.

- It might cause an unexpected accident by the steering wheel's working of the brake neither the brake twice power device nor the power steering's working, worsening, and becoming very heavy and is dangerous if it doesn't engine starts.

注意 Adjust the handle position and neither mirror nor the driver's seat seat while running.

- Driving is mistaken while adjusting it, and it might cause an unexpected accident by the seat's suddenly moving and is dangerous.

Warning

4.

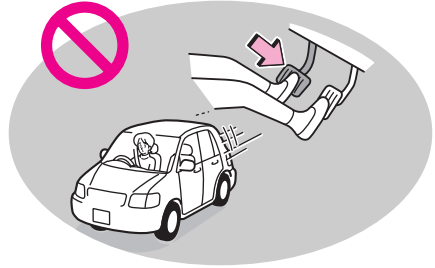

Attention

When

running

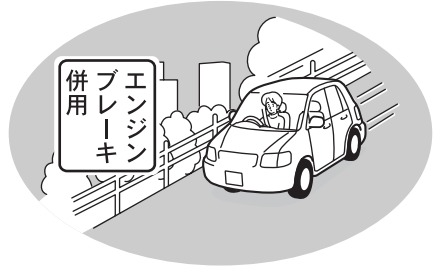

澆 Do not run with the door mirror knocked down.

- It cannot confirm the rear side with the door mirror, might cause an unexpected accident, and is dangerous.

湧 Do not put the foot on the brake pedal, and run with the parking brake put.

- It wears out the brake pad early, and overheats the brake, worsens working of the brake, might cause an unexpected accident, and is dangerous.

潜 Use the engine brake together in the downward slope.

- Working of the brake might worsen by overheating when keeping stepping on the brake pedal and it is dangerous.

注意 Start the engine when you move the car a little.

- It might cause an unexpected accident by the steering wheel's working of the brake neither the brake twice power device nor the power steering's working, worsening, and becoming very heavy and is dangerous if it doesn't engine starts. -

It might cause an unexpected accident when the car is moved by not starting up an engine, and using the slope and is dangerous.

Warning

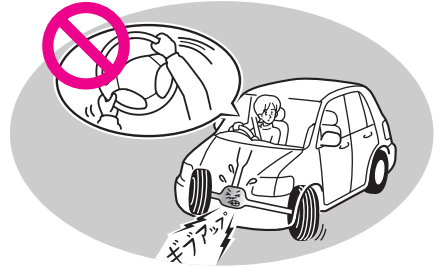

4.

Attention

when

running

注意 Do not keep being long the state to spend the steering wheel fully.

- The temperature of oil goes up too much, and defective lubrication is caused, and the power steering device might be damaged. (2.0L car <Z grade > and 4WD car)-

The power steering motor might damage by overheating.

(2.0L car <G grade > and 1.8L car < FF car >)

The power steering control is limited to prevent the motor and the computer overheating and the steering wheel control becomes heavy when maintaining it with power put on the steering wheel the repetition of the steering wheel control while being stopping and .. minute and low-speed running.

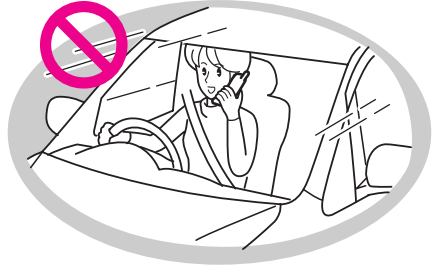

In this case, refrain from the steering wheel control for a while. It returns to usual weight when about ten minutes pass without doing the steering wheel control.

(2.0L car <G grade > and 1.8L car < FF car >)

- When the operation to which the limitation of the overheating prevention hangs is frequently repeated, it causes the breakdown of the system.

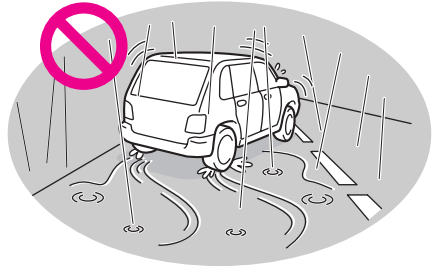

(2.0L car <G grade > and 1.8L car < FF car >)

得 Do not use the car telephone and cellular phones other than hands-free and do not use those who drive while driving.

- It is prohibited to use the car telephone and cellular phones other than hands-free while those who drive are driving by the law. -
- It turns to the telephone when it calls it and when it has had a telephone call note, might cause an unexpected accident, and is dangerous.
- Use it after it stops in the place of safety when those who drive use the car telephone and cellular phones other than hands-free.

潜 Run especially carefully on a slippery road on the road and a wet snowfall road and the frozen road, etc.

- A rapid brake, rapid acceleration, and a rapid steering wheel in a slippery road slip the tire, cannot control the car, might cause an unexpected accident, and are dangerous. -
- An engine brake by the improvement shift down of the shift and a rapid change in the engine rotational speed might cause an unexpected accident by sideslipping by the car and are dangerous. -
- Decelerate beforehand in a frozen place such as on the bridge and shade when it is cold, and run carefully. -
- Run carefully in beginning get off about rain so that the road is slipperier.

Warning

4.

Attention

When

running

潜 Do not run on the flooded road.

- It might cause a serious vehicle breakdown to damage the engine by not only the engine stall if running on the flooded road but also the inhalation of the short of electrical equipment and water. Check the following item etc. in the Toyota shop when running on the flooded road by any chance, and soaked in water.

蘆 Effective condition of brake.

蘆 Change in amount of oil and qualities such as engine transmission transfers (4WD car) and Def. (Because water mixes when becoming cloudy, the exchange of oil is necessary.)

蘆 Lubrication is defective in the propeller shaft (4WD car) and each bear and collaborate each.

潭 Do not push the reception desk defroster switch when you operate the air conditioner when humidity is very high.

- It is cloudy in the surface of the outside of the window glass in the temperatures fluctuate of air and the window glass, and might disturb view.

激 When stacking *

- The drive wheel was not able to run idle on mud, sands, and the Miyuki road, etc. , and to move being buried and crowding.

- Confirm surrounding safety enough when you attempt the escape from the stack. The one is damaged by the power of the escape, and the accident resulting in injury or death might be caused and it is dangerous. -

Do not rotate the tire at high speed. The burst (explosion), and the tire might cause an unexpected accident by abnormal overheating about driving parts (differential gear etc.) and is dangerous. -

Note the following might damage a transmission and a differential gear, etc. when you unavoidably repeat advancement and the retreat for the escape from the stack.

⚠ The gear-shift 綺O r, 緘 After it puts it in certain, ..gas pedal.. ..lightly.. ..stepping.. Give to me. Moreover, never step on the gas pedal while operating the gear-shift.

⚠ Race neither excessive revving nor the tire.

⚠ Operate the brake after the engine rotation lowers when the tire runs idle in excess.

⚠ Discontinue this operation when you cannot escape even if it goes several times. -

The following method is effective for the stack escape.

⚠ Remove the soil and the snow before and behind the tire.

⚠ Allot the tree and the stone, etc. under the tire.

- When the rope is pulled to the pulling hook and the suspension parts, etc. putting it, the pulling hook and the suspension parts might be damaged. Do not forcibly pull, and request it to the Toyota shop and JAF, etc.

Warning

4.

Attention

When

running

撞 Confirm the brake works normally lightly stepping on the brake pedal after it runs of after a car is washed and the puddle.

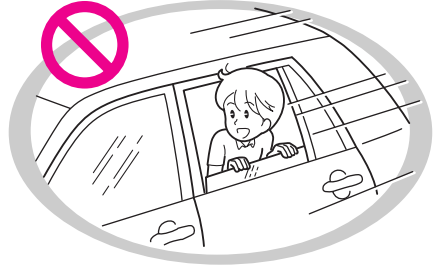

- When the brake pad is wet, it worsens working of the brake, and is taken the steering wheel effective only of one that has not been wet, might cause an unexpected accident, and is dangerous. -
- Confirm the brake works normally lightly stepping on the brake pedal several times until effective recovers very noting surrounding safety when effective is bad.

潘 Do not move while running ..get on to places other than the seat and in the car...

- It flies the body when time that slammed on the brakes and colliding, and the head etc. are strongly stricken, and it reaches important injury or, in the worst case, it is likely to lead to the death.

意 Produce neither hand nor the face from the window and the Moon roof.

- In the worst case, it reaches important injury or, it is likely to lead to the death by hitting the one outside the car etc. , and throwing the head at the window frame at a rapid brake while running when the hand and the face have been produced. -
- Is not the waist in the opening of the Moon roof or disregard it. The roof dents, and it is thrown out from the car at the emergency, and it reaches important injury or, in the worst case, it is likely to lead to the death.

酒 Note that other people's neither hand nor head, etc. are placed when you close the door glass Moon roof.

- In the worst case, it reaches important injury when placed between the door glass and the Moon roof or, it is likely to lead to the death.

Warning

4.

Attention

when

running

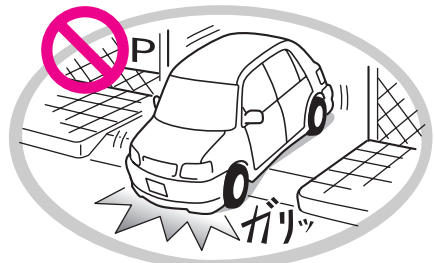

濼 Do not run with Fta of the glove box and small articles putting opened.

- It dashes out when slamming on the brakes luggage, might cause an unexpected accident, and is dangerous.

濼 Do not run with the one put on the Instrument panel and the dashboard.

- It disturbs driving person's view, and becomes an obstruction of the safe driving while starting and running, might cause an unexpected accident, and is dangerous when running with the one put.

Run carefully in the place with a big difference.

- The bumper might be damaged, and risk the speed and run carefully when you run in the following places.

蘆 When passing over the place with the difference in the doorway etc. of the parking lot

蘆 When you run in the place where the inclination like the slope etc. of the multistory parking garage is sudden

蘆 When garrisoning stopping along the place and the shoulder that includes trigs etc.

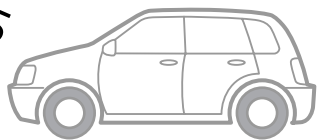

蘆 When you run on the road in the ruggedness and the rut that is

蘆 When you pass the hollow (hole) etc.

蘆 When it goes into the acclivity and the downward slope from the smooth road, and it goes into the smooth road from the acclivity and the downward slope

濼 Do not pull the driver's seat door lever while running.

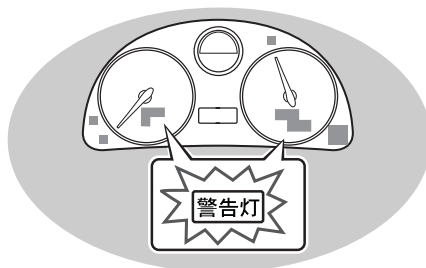

- Do not pull the driver's seat door lever while running. In the worst case, it reaches important injury or, it is likely to lead to the death by the door's opening and being thrown out outside the car.

5. While running when abnormally noticing

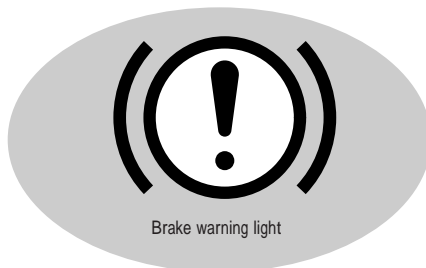

Defend the following matter while running when abnormally noticing. It might cause an unexpected accident and serious injury if it doesn't guard and is dangerous.

満 Stop in the place of safety, and treat it at once when the warning light is lit and blinks.

- An unexpected accident might be caused, and the engine etc. be damaged when running while light and blinked. Confirm the content of the warning light, and do appropriate treatment. (Refer to P.262.)

満 Do not keep running with light the brake warning light.

- Stop in the place of safety at once and contact the Toyota shop when the warning light becomes the following.
 - 満 In the state of lighting even if you release the parking brake while the engine is rotating. In this case, it might cause an unexpected accident as working of the brake worsens, and the slip distance for brake becomes long and is dangerous. Step on the brake pedal hard when effective is bad.
 - 満 The brake warning light : the ABS& brake assistance warning light or in the state of lighting at the same time as ..the ABS warning light... In this case, abnormality might not only occur in ABS or the brake assistance (2.0L car <Z grade > and 4WD car) but also the vehicle becomes unstable in the brake of strengthening.

Warning

5.

While

running

when

abnormal

noticing

澆 Settle down and operate it when you stall.

- When stalling, the brake twice power device and no hydraulic apparatus and no motor of the power steering operate, working of the brake worsens, and the steering wheel becomes heavy.

In this case, it is not because the braking effort etc. were lost, and make efforts usually, operate, confirm surrounding safety, draw to the shoulder, and stop.

澆 The tire must not panic even in case of the blowout and the burst (explosion) and correspond while running.

- Firmly have the steering wheel, apply the brakes gradually, and reduce speed. A rapid brake and a rapid steering wheel might not be able to control the vehicle. - The blowout and the burst are thought at the following time.

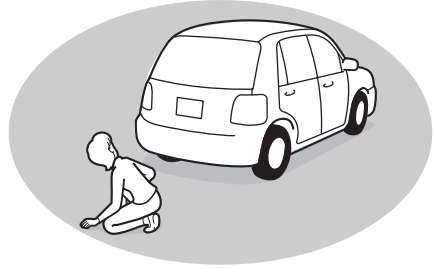

蘆 When the steering wheel is taken.

蘆 When there is an abnormal vibration.

蘆 When the vehicle inclines abnormally.

- Do not run while blowing out. It becomes an unstable running if keeping running while blowing out, might cause an unexpected accident, and is dangerous. Moreover, the tire disc wheel and the suspension and the body might be damaged. Exchange it at once for the spare tire.

潜 Pull up a car to the place of safety at once, and check the circumference in the under when you receive the high impact to the body below the floor level and the tire disc wheel.

- Under such a condition, the brake liquid and the fuel leak or, it uses it so that there are a transformation of a suspension parts, a tire disc wheels, and the drive and the system parts, etc. and possibilities of damage and it might cause an unexpected accident and is dangerous. -

Do not use as it is and consult the Toyota shop when the leakage and damage are found.

澁 It is a use limit of the brake pad to generate the warning sound ("Key key" sound) from the vicinity of the brake continuously while running. Receive the check in the Toyota shop.

- The warning sound generates the warning sound (metallic sound "Key key") by the one by the brake pad wear indicator while running, and informs those who drive of the brake pad's having approached the use limit.
Receive the check at once in the Toyota shop when you generate the warning sound.
- It is lost of the brake pad when keeping running with the warning sound generated, damages the brake parts, and worsens effective, might cause an unexpected accident, and is dangerous.

6. Attention when stopping garrisoning

Defend the following matter when you stop garrisoning.

In the worst case, it reaches an unexpected accident and serious injury if it doesn't guard or, it is likely to lead to the death.

酒 The parking brake is put, and stop, and lock the engine when parting from the car.

- When parting from the car, the engine is obligated to stop without fail, and to be locked by the law. Moreover, the one in the vehicle theft and the car might not be stolen, and do not put valuables etc. in the car. -

Defend following when parting from the car. It begins to move by uninhabited by the car if it doesn't defend, might cause an unexpected accident, and is dangerous.

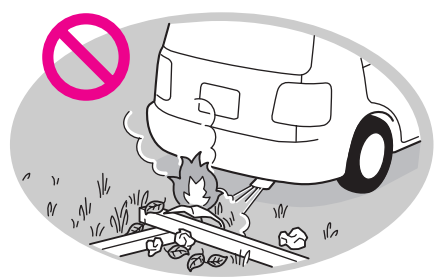

蘆The gear-shift 綫.

蘆Put the parking brake.

蘆Stop the engine.

蘆Lock the door.

酒 Do not pull up a car to the vicinity of the combustible.

- It might connect with a fire when there are combustible one in the rear side of the vehicle and the vicinity of the exhaust tube and is dangerous. -

Stop the rear end of the vehicle about 30cm or more apart when the rear side of the vehicle includes wood and plywood, etc. It discolors and it transforms it with the vehicle exhaust emission, and when the space is a little, it might connect with a fire and is dangerous. -

Neither dry grass nor the wastepaper, etc. must not run on, and pull up a car though are combustible. When it is to become a high temperature, and near the combustible, it is likely to connect with a fire and the exhaust tube and the vehicle exhaust emission are dangerous.

Warning

6.

Attention

when

stopping

parking

澆 Do not rev while stopping.

- It overheats the exhaust tube, might connect with a vehicle fire, and is dangerous.

滯 Do not leave the can etc. of the glasses writers spray can and the carbonated drink left in the car when you park under the scorching sun.

- It might connect with a vehicle fire by the gas of the writer and the spray can naturally leaking, and exploding because it becomes a high temperature very much in the car and is dangerous. -
- The room might be made dirty, and Electricity Division goods cause to be short by the can of the carbonated drink exploding. -
- The transformation and the crack of glasses of a plastic lens and a plastic material might be caused because it becomes a high temperature very much in the car.

潛 Stop the engine when you take a nap.

- It might connect with a vehicle fire because of an abnormal overheating of the accident by the jack rabbit start of the car and the engine by unconsciously moving the gear-shift, and depressing the gas pedal when taking a nap while started up an engine and is dangerous.
- The exhaust tube has been damaged, and moreover, the vehicle exhaust emission invades in the car, it becomes CO intoxication, and it reaches important injury or, in the worst case, it is likely to lead to the death in the place where ventilation is bad.
