

Maintenance of car

The usual maintenance

The usual maintenance is necessary to keep the car to be beautiful indefinitely.

● About the carwash and the wax articles

Often read the explanation that has been described to each articles, and guard the usage and notes, etc.

● Wax must be disregarding once a month.

Go when shedding once a month or water worsens.

● About keeping and parking

We will encourage the place with an airy garage and the roof.

● About painting

- The stepping-stone wound and the scratch cause corrosion, and repair with the Toyota pure touch-up paint etc. ahead of time when finding it. -
Benzine..gasoline..organic..solvent..adhere..painting..damage..at
once..wipe off..wash a car.

 In the following cases, wash a car at once. 

It causes deterioration in painting and the corrosion of the body and parts, etc. to be brought forward. -

When you do running of the coast zone. -

When you run on the road where the antifreezing agent was scattered. -

When coal tar, sap, and bird's excrement and insects' corpses etc. adhere. -

When you run in the place where a lot of descents such as smoke, lamp soot, dust, iron filings, and chemicals exist. -

When remarkably becoming dirty with dust and mud, etc.

When you wash a car

Wipe water off after it washes off the grime while sprinkling water enough, it washes, and it drops. -

Do the circumference under the body and the underside and on in order below. -

Wash the body in the soft one such as the sponges and the chamois. -

Flush it enough by using the car shampoo in water when dirt is awful. -

Wipe water off so that the macula should not remain.

When you use the automatic carwash machine

- Store the mirror, and detach, and wash the antenna from the front side. -

Occasionally, the wound of the brush or more might attach, the luster of painting be lost, and deterioration be brought forward. -

It is likely to be caught of Riyaspoirar according to the carwash machine, is not able to wash a car, to be damaged, and to damage it.

When you use the high-pressure carwash machine

Do not bring the point of the nozzle close to the door glass etc. too much. Water might enter indoors because hydraulic pressure is high when bringing it close too much.

Maintenance of aluminum foil

- Contain the soapless soap in the sponge, and wash off dirt ahead of time. It is damaged easily, and use neither detergent that the grinding medicine enters nor a hard brush. -

It is likely must not to lose its gloss, and the hot water must not splash directly to the wheel by washing steam.

When wax disregards it

The body does when the temperature is cold (Give below about the temperature to me as a standard) after washing a car.

About the glass with Rancieringmirar and a water-repellent function

2.0L car

Defend notes of "Glass with a water-repellent function" of "Rancieringmirar" of P.377 and P.378 about maintenance.

警告

Do not sprinkle water in the engine room.

- Do not sprinkle water etc. on electric parts in the engine room. It is short-circuited of a failed start and electric parts of the engine, might lead to the breakdown and a vehicle fire, and is dangerous. -

Note that water doesn't splash directly to the brake when you wash a car at the cold.

Working of the brake worsens, and it might cause clinging of the brake, and it is not likely to be able to run by freezing when water enters in the brake device. -

Confirm the brake works normally lightly stepping on the brake pedal after washing a car.

When the brake pad is wet, it worsens working of the brake, and is taken the steering wheel effective only of one that has not been wet, might cause an unexpected accident, and is dangerous.

注意

Do not injure when you wash a car.

- Do not injure to the hand when you wash the circumference and the underside in the under. -

Use a hard neither brush nor scourer, etc. when you wash a car. Painting etc. are damaged. -

Be not do not wipe the surface of the lens of the lamp with organic solvents such as wax, benzene, and gasoline, worth, and do not rub with a hard brush etc. Might it damage, and deterioration be brought forward.

The indoor cleaning

Remove dust with the car cleaner and the vacuum cleaner, etc. , and wipe off lightly with the cloth to contain water or lukewarm water.

Do not sprinkle water in the car.

- Do not sprinkle water in the car when you clean the car. It causes the car breakdown, and when water splashes to electric parts etc. that the audio and floor carpet under includes, it might connect with a vehicle fire and is dangerous. -
- Do not use organic solvents such as benzine and gasoline to clean the seat belt. Moreover, do not bleach, and do not dye the belt. Important injury that decreases the performance of the seat belt, doesn't demonstrate an enough effect at the collision etc. , and is related to the life might be received and it is dangerous. Do not use the seat belt until drying by using the soapless soap or lukewarm water when you clean it.

Note the element included in the cleaner.

- Do not use an organic solvent, an acid such as the benzine gasoline or an alkaline solvent when you maintain the interior. Discoloration and doing cause seeing. Moreover, these elements might be included in various cleaners, and use it after it often confirms it. -
- Note no allowance of the interior goods (air conditioner and audio, etc.) aromatic substance's (liquid, solid, gel, and plate type, etc.) direct touch, and spilling. It might cause discoloration and seeing and the painting peeling off of doing according to the included element. -
- Do not use the glass cleaner etc. when you clean the inside of the backing door glass. Heat ray is disconnected, and it is likely not to operate. Wipe the cleaning lightly with the cloth to contain water or lukewarm water along heat ray. -
- Do not use the glass cleaner that the compound enters when you clean the inside of the glass. Wipe the cleaning lightly with the cloth to contain water or lukewarm water.

Maintenance of air conditioner

● Check of air conditioner gas (refrigerative)

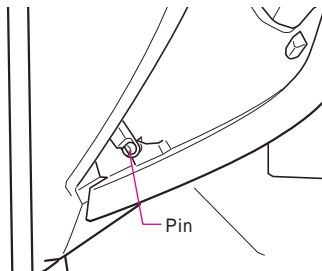

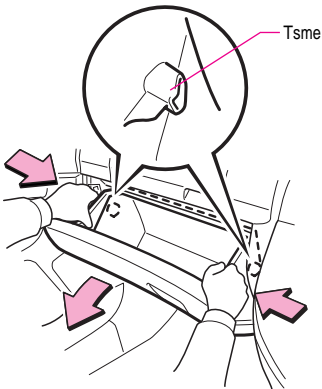

The air-conditioning performance decreases when the refrigerative is insufficient.
Check and replenish it before summer comes.

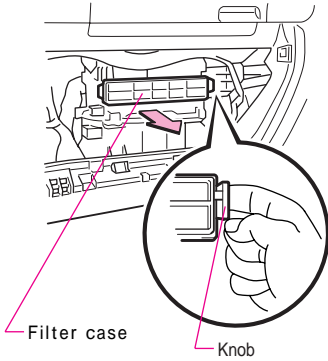

● Exchange of clean air filters
